EDUCATION

Singapore Management University

Singapore

Bachelor of Science in Computer Science

August 2020 - December 2023

- Teaching Assistant for Collaborative Software Development (CS203)
- Relevant Coursework: Data Structures, Design and Analysis of Algorithms, Networks, Operating Systems, System Design, DevOps & Machine Learning
- Honorary Finance Secretary of SMU Stereometa, the premier student DJ-ing collective in Singapore

EXPERIENCE

Quantitative Technologist Intern

January 2024 - Present

Qube Research & Technologies

Hong Kong

- QRT is a quantitative investment management firm that deploys investment strategies globally, across asset classes
- Built a tool that allows researchers and developers to intuitively create and manage compute clusters as well as submit, monitor and scale their computational workloads
- Refactored an existing MLOps tool, to increase productivity of colleagues, enhance modularity and scale compute more efficiently
- Technologies used: Python, Ray, Linux

Research Assistant

Aug 2023 - December 2023

National University of Singapore

Singapore

- Sole developer working on fine-tuning ML models to process thousands of hours of audio for Automatic Speech Recognition, Sentiment Analysis, Named Entity Recognition, Pseudonymisation, and Feature Detection
- Supported medical researchers from the School of Medicine at NUS to implement a machine learning pipeline for Natural Language Processing on Student volunteers' reflections about their cognitive performance
- Technologies used: Python, Linux, Pytorch

Software Engineering Intern

January 2023 - May 2023

Grab

Singapore

- Grab is South East Asia's first decacorn; a super-app which provides users transport, deliveries and payments
- Built an internal data platform and associated tooling in the Automated Scalable Insights team
- Led the migration and overhaul from Express.js to Python FastAPI for a backend service that automates and orchestrates various ETL workflows and visualisations across business verticals
- Built features for data scientists and product leaders to visualise, collaborate and **derive actionable insights** from metrics in real-time, using Flutter
- Designed scalable systems using AWS and Azure services and contributed to database design

Software Engineering Intern

 $May\ 2022-August\ 2022$

 $Ox\ Street\ by\ Carousell\ Group$

Singapore

- Ox Street is a streetwear marketplace part of the Carousell Group, for new and used sneakers
- Developed a full overhaul of the main web application in NextJS with TypeScript React, working full-stack
- Built a ML recommender system for similar products based on users' likes and views
- Implemented a pipeline for internationalisation (i18n), translation management and automatic routing
- Followed best practices in phased development, writing unit tests and interaction tests with **Storybook**

Data Science Intern

June 2021 - October 2021

Ox Street by Carousell Group

Singapore

- Implemented data visualisation, processing and conversion tracking with tools such as Pandas & Google Analytics
- Programmed a **price-monitoring service with Flask on Heroku** to gather up-to-date and accurate pricing data, allowing the number of accurate listings on the app to increase by over 100%

TECHNICAL SKILLS

Languages: Python, Java, C, TypeScript, Golang, SQL, Dart

Frameworks & Libraries: FastAPI, Spring Boot, React, gRPC, Node.js, Tensorflow, Pytorch, pandas, Flutter Tools: Git, Docker, Postgres, Amazon Web Services, Google Cloud Platform, Azure, Kubernetes, MongoDB, IATEX Certifications: Oracle Certified Foundations Associate (Java)
